INFORMATION OF THE SURVEY CONTENT

The survey consists of following parts, based on Your choices in questions 4 and 24 You are guided to answer a selected set of questions.

1 - 4 General questions

- * 5 - 12 Production related questions
- * 13 - 17 Service and equipment manufacturer related questions
- * 18 - 23 General questions

24 Your choice of interesting topics (5 set of questions).

- * 25 - 30 Education & Training
 - * 31 - 38 Maintenance assesment
 - * 39 - 45 ICT, Digitalization, Industry 4.0
 - * 46 - 55 Asset management
 - * 56 - 66 Health & safety
- 67 - 68 Survey feedback, info

Networking Is Good

After the long period of COVID 19 restrictions the networking world is approaching the normal situation. We have seen several events and fairs being organized almost in normal circumstances all over Europe. The statistics from event organizers are showing that the number of visitors at fairs year 2022 have dropped some 30%-40% from "normal" figures. Organizers assume that the event industry will be back in traditional business figures in 5 years.

The big thing for EFNMS is coming Euromaintenance event in Rotterdam (Netherlands) which will take place 17-19th of April 2023 (<https://www.euromaintenance.net/>). It has been a long break after the Euro-maintenance 2018 which was held in Antwerp Belgium. Euromaintenance 2023 in Rotterdam will again collect the top players in maintenance industry together – again with excellent

conference content and combined with Maintenance NEXT exhibition.

As we know there are some dark clouds on the sky concerning the situation in Europe – we all see the rising energy prices and uncertainty of international business. The interest for improving the energy efficiency is rising and professional maintenance is an effective part of the energy efficiency and circular economy. Most probably during the coming winter we will see and develop new innovative ways to save energy and get most out of the materials and tools we are using. To ensure and support this we must further improve the cooperation between the countries and business organizations.

On personal level this means that we must be patient and tolerate some negative things. The same time we must get back on the track with external activities – in Finnish history about the wars we have a saying that "You should not stay lying under the (gun)fire" – but stand up and proceed. What we have seen is that peoples and organizations are not very determined and focus oriented in the new situation. Today more as never we need to be fast and focused on improving things, making new innovations and being open to new ideas and new contacts.

Global and European level networking is needed, and

it is vital for company and personal development. To get most out of the networking, we need to understand with whom and for what we need to connect. To help this thinking EFNMS has been working with an EMAM survey, that was launched in December 2022. The results of this survey will be reported during the Euromaintenance 2023 event in Rotterdam. Persons answering the survey will get survey-report after the survey is finalized mid-March 2023. More information via EFNMS webpage and other medias.

Hope to see You latest in Rotterdam April 2023!

*Jaakko Tennilä
Executive Director / Board member
Finnish maintenance society,
Promaint / EFNMS, European
Federation of National
Maintenance Societies*
