Security – Access Control

100 years Expertise in the Security Industry

MASTER LOCK, Padlock Manufacturer since 1921

Our environmental commitments

Reduce the Energy, Water and Materials we use

- Master Lock safety padlocks use a high percentage of recycled metal :
 - Steel shackles.
 - Brass keys,
 - Cylinders,
 - Aluminum lock bodies, are all manufactured using recycled material.
- Master Lock thermoplastic padlock bodies are molded using a hot runner injection molding process that results in virtually no scrap metal.
- Master Lock has successfully implemented recycling programs to keep these pieces out of landfills.
- On an annual basis, MASTER LOCK RECYCLES ABOUT 14 TONS OF POLYETHYLENE AND ABOUT 6.500 TONS OF METAL!

q

Treating people with dignity & respect, executing our mission with ethical operations

High standards applied to our associates, suppliers & products

- Supplier Code of Conduct :
 - Our supply chain is a critical element in meeting our commitment to responsible business.
 - We expect all suppliers and contractors to comply with our strict standards for the respect of human rights, workplace safety and protection of the environment in the work they perform and the services they provide, in accordance with our Supplier Code of Conduct.
- Across our organization, our internal management system processes support the International Standards Organization (ISO) and the Occupational Health and Safety Assessment Series (OHSAS) certifications. For supply chain partnerships in developing countries, Fortune Brands provides support to help our business units evaluate a new opportunity or existing partnership.
- All manufacturing sites are
 - ISO 9001:2015 compliant
 - Environmentally up to date
 - Corporate Citizenship
- Our Logistic Center for Europe in Le Havre (France) is certified
 - ISO 9001:2015
