

CSRD Roadshow

BUILT ENVIRONMENT

CSRD in short

Although the precise contents of the guideline are still indistinct, the core is clear. Companies will have to take drastic responsibilities for what happens in their chain. The aim is for them to invest more consciously and thus contribute to a green, fair world where it is sustainable to live and work for everyone. Reporting on Sustainability goals is new for many companies and informationsystems are often not yet set up for it. The CSRD roughly comprises three pillars: 'Environment', 'Social' and 'Governance'. Abbreviated as ESG.

The EU directive requires companies with an annual turnover of €40 million to report on the ESG themes most relevant to them. The larger the company, the greater the reporting burden. Reporting consists of 17 Sustainable Development Goals: →

But the guideline is also a fantastic tool on the road to Sustainability for smaller organizations!

Powered by

NVDO, EFNMS and Sdu make the CSRD guideline attractive!

What is the CSRD? How does this affect you, your maintenance team and your business? But above all: what do you get out of it? We answer these questions in the Roadshow, focussed on the sectors Infrastructure, Built Environment, Process Industry and Manufacturing.

CSRD Roadshow BUILT ENVIRONMENT

28 March 2024

Location: Online

Time: 12.55-14.00 CET

Speakers

CSRD in short

Chantal de Groot, Accountmanager, Sdu

The European CSRD directive, which focusses on materials testing, and the associated standards, the so-called ESRS, have been introduced since 1 January, 2024. But, what is the CSRD? Who will this apply to and when? What should you do? And how do you ensure that you are compliant in the Built Environment sector? Learn from Sdu!

Sustainability as the foundation of their service portfolio

André van Tongeren, Associate Director Healthcare and Life Sciences, Apleona Group

Sustainability isn't new to Apleona, it is deeply rooted in their DNA. Recognising the need to decarbonise the economy and society, as well as the need to address the major ESG challenges of our time, Apleona decided to become even bolder in its actions. They have updated their ESG strategy and followed training sessions on carbon accounting, CSRD and the EU Taxonomy. The ESG vision of the Apleona Group gives them clear positioning and makes them a sustainable partner!
