

# EFNMS organizes a Benchmarking Workshop

– at the EuroMaintenance congress in Rimini, Italia.

## **The maintenance management process – and the associated indicators.**

At the workshop the delegates will be introduced to the European standards for maintenance processes and maintenance indicators. Those two components provide the platform for a trustworthy assessment and comparison process for your maintenance function.

**The workshop will be organized at the afternoon 16th September 2024**

The workshop participants will be presented for a generic maintenance process and will be invited to a deep dive into the process for maintenance management.

The workshop is also a response to the question of: “Which indicators to be applied to my maintenance processes?” The workshop will give an answer to this universal question.

## **Workshop delegates and facilitators**

The workshop is intended for any maintenance professional engaged in performance measurement and maintenance management.

The workshop will be conducted in the English language and will be facilitated by Dr. Reinhard Korb, CEO Designate from MCP Consulting Group and Tom Svantesson CEO from TSMC ApS. Both facilitators come from the European Maintenance Assessment Committee – EMAC.
